SKILLS

Languages: Ruby, Golang, Typescript, Javascript, SQL

Frameworks/libraries: React, Apollo, GraphQL, gRPC, Rails, GatsbyJS, Buildkite, Styled-components, Datadog

EXPERIENCE

Policygenius, New York, NY – *Senior Software Engineer*

December 2021 – PRESENT

- **Primary tech stack:** Golang, Rails, React, Typescript, Postgresql, K8s
- Developed and maintained over 6,000 static webpages using Contentful CMS and GatsbyJS, achieving build times under 15 minutes.
- Collaborated closely with the editorial team to develop custom features within the CMS to improve SEO and ranking.
- Spearheaded the development of a B2B SaaS platform for insurance advisors, leveraging React, TypeScript, GoLang, GraphQL, and gRPC to streamline client management and quote generation.
- Led the migration of our internal communication system from a RESTful monolith API to a microservices architecture, utilizing Golang and gRPC to improve scalability and performance.
- Designed and implemented automated testing and deployment pipelines to improve development efficiency and code reliability
- Mentored and trained over 8 junior developers, fostering a collaborative and productive team environment.

Policygenius – *Software Engineer III*

July 2020 – December 2021

Policygenius – *Software Engineer II*

January 2019 – July 2020

Rumblish, New York, NY – *Software Engineer*

May 2017 – January 2019

- **Primary tech stack:** Ruby/Rails backend with a React/AngularJS front-end
- Lead an ETL project in order to extract and normalize punisher and writer data
- Implemented docker for local development, QA and production environments.
- Created our notification center application which was in charge of sending emails and statements to publishing companies

EDUCATION

Boston University – *B.S Health Science 2014*
